

High speed and security

UIC Security centre of competencies
Jacques Colliard

Enable the high speed train user to feel secure

The technical efficiency is well known

The customers ask for

- *Maintaining the highest level of safety*
- *Developing a policy and a feeling of security*

High speed trains : a transport mode to be protected

A transport mode, part of possible terrorist targets

- *Technological symbol*
- *Media aspects*

A transport mode with high financial value

- *Cost of the trains and installations*

**Faced with these aspects, opportunities de develop
a specific security policy**

-Possible control of influx

-Specific rooms if planned

-Possible profitability of security measures and investments

Security of high speed transport : measures to be taken

Objective security conditions / Security feeling

- *Procedures and regulation*
- *Human factors : customers and staff*
- *Technologies : detection, CCTV,*

High speed transport security seen from infrastructure point of view

-Critical infrastructure protection

-Partnership national authorities / railway companies
