Press Release nr. 1 / 2010

New coordination between UIC, CER and EIM

(Paris, 04.01.10) The successful conclusion of the series of tripartite meetings between CER*, EIM* and UIC* culminated in the creation of the “Coordination Technical Group” (CTG) to be located in Brussels. In order to clarify the roles and responsibilities of the associations and with UIC being the technical platform bringing its expertise and support to this process, the UIC will close its official representative office in Brussels with effect from January 2010 but will keep the necessary technical presence to fulfil its technical role in CTG and as a liaison with the other associations in Brussels.

*

*CER, Community of European Railway and Infrastructure Companies
EIM, European Rail Infrastructure Managers,
UIC, International Union of Railways*
